Kerio**Mail**Server6

ALL-IN-ONE MAIL SERVER FOR SMALL BUSINESSES

Kerio MailServer is a messaging and collaboration server that provides powerful protection against viruses and spam, and delivers secure access to email, contacts, tasks and calendars. A true groupware alternative to Microsoft Exchange, Kerio MailServer is ideally suited for the needs of small and medium sized companies, allowing Microsoft Outlook and Microsoft Entourage clients to easily access email messages and collaboration tools.

TOP PRODUCT BENEFITS

A True Alternative to Microsoft Exchange
Choose a less complicated and less expensive alternative to MS Exchange 2000/2003 that is better suited for small to medium sized businesses (SMBs).

An Integrated Secure Solution
Get robust e-mail protection with integrated anti-spam and anti-virus at the gateway.

Microsoft Outlook or WebMail
Manage calendars and tasks from Microsoft Outlook and Microsoft Entourage clients, or use Outlook-like WebMail.

Easy to Deploy and Manage
Administrators can install, configure and manage the mail server much more easily than other solutions, lowering the total cost of ownership.

Multiple Platform Support
Choose from any of the following platforms for deployment or administration: Windows, Mac OS X, SuSE or Red Hat Linux.

Smooth Migration from Microsoft Exchange
No need to lose old calendars, tasks or email. Kerio's migration tool transfers everything from Exchange to Kerio MailServer.

FREQUENTLY ASKED QUESTIONS

Topic	Question	Response
Company	I haven't heard of Kerio, who are they?	Founded in 2001, Kerio Technologies, Inc. focuses on network and desktop firewalls and secure workgroup messaging systems for small and medium sized companies. Kerio is headquartered in California with sales and technical support offices in Great Britain and the Czech Republic.
Configuration & Compatibility	Which OS do you recommend?	We recommend using the Operating System that you have the most experience with and are most comfortable with. Kerio MailServer 6 runs on Windows 2000/XP/2003; Red Hat Linux Enterprise 3 or higher; SuSE Linux 9 or higher; and Mac OS X 10.3 or higher.
	Is Microsoft Active Directory supported?	**Yes**. In addition to using the internal user database, administrators can use Microsoft Active Directory or Apple Open Directory for user authentication and management.
	Which clients does it support?	Kerio MailServer supports virtually any POP or IMAP client. For calendar and contact sharing, Kerio MailServer supports Microsoft Outlook on Windows and Microsoft Entourage on Mac OS X. Kerio MailServer has its own WebMail client and supports mobile phones via WAP. Supported browsers include Internet Explorer 6 or higher, Mozilla 1.4 or higher, Firefox, and Safari 1.2 or higher.
Administration	Can administration be done remotely?	**Yes**. The Administration Console can connect remotely to one or more Kerio MailServer engines from any of the supported operating systems.
Reliability	Is it possible to back up e-mail?	**Yes**. Kerio MailServer can schedule complete backups of the message store. For emergencies, the recovery tool helps restore the mail server in minutes.
Security	How do users authenticate to the server?	Kerio MailServer supports CRAM-MD5, DIGEST-MD5, GSSAPI, LOGIN, NTLM, and PLAIN authentication methods. Kerio MailServer also easily imports SSL-certificates for secure WebMail.
	How well does Kerio MailServer filter spam?	Kerio MailServer provides efficient spam scoring and Bayesian filtering. Custom filter rules and user-based learning mode can block more than 90% of spam.

PRICING AND LICENSING GUIDELINES

License Model – A 20-user BASE license is required. To increase the number of users, the appropriate combination of Add-on licenses should be purchased.
