

Kerio WinRoute Firewall 6

A COMPREHENSIVE FIREWALL/VPN FOR SMALL BUSINESSES

Kerio WinRoute Firewall is an integrated firewall, VPN Server, anti-virus gateway and content filter solution that provides comprehensive security for all the needs of small and medium sized businesses. Its powerful user management allows for every user

or user group to have an individual network access policy. Certified by ICSA Labs in the Corporate Firewall category, Kerio WinRoute Firewall provides detailed rule definition for stateful inspection of all outgoing and incoming Internet traffic.

TOP PRODUCT BENEFITS

Comprehensive Firewall and VPN Security

By providing a fully integrated solution with firewall, VPN Server, anti-virus and content filtering, small and medium sized businesses can solve their Internet Security issues with a single, comprehensive solution.

ICSA Labs Certification

Kerio WinRoute Firewall has achieved the same level of security certification as the top selling enterprise firewall solutions. www.icsalabs.com

Content Filtering

Filter out potentially dangerous executable files, block pop-up windows and peer-to-peer networks.

User-specific policy enforcement

Administrators can specify an individual network access policy for each user or user group.

Easy, Flexible Deployment

The traffic policy wizard configures in minutes. Deploy in networks of all sizes and locations with support for DSL, cable modems, satellite, dial-up or wireless Internet. Active Directory support allows firewall to seamlessly integrate into Windows networks.

Remote Administration and Monitoring

Securely manage all settings and security policies remotely. Get alerts, statistical graphs, and detailed traffic histograms for users or the entire network.

FEATURES AT A GLANCE

Technology	Feature/Benefit	Standard Edition	McAfee Edition
Kerio WinRoute Firewall	Comprehensive network firewall with detailed rule definition to perform stateful inspection and protocol inspection of all outgoing and incoming Internet traffic	•	•
Kerio VPN	Built-in SSL-based VPN server works in both client-to-server and server-to-server modes for branch offices and remote workers to securely connect to the corporate LAN	•	•
Content Filter	Filters out potentially dangerous or undesired files from peer-to-peer (P2P) networks, HTTP ActiveX and JavaScript content on the Web, and FTP servers	•	•
Surf Protection	Prevents users from browsing inappropriate content and generates reports on user browsing patterns (requires optional ISS Orange Web Filter)	•	•
Anti-virus	Choice of Anti-Virus control with support for for Alwil, Eset, Computer Associates, Grisoft, Sophos and Symantec plug-ins	•	—
	Integrated virus filtering with McAfee built-in for automated virus database updates and no-nonsense configuration	—	•

SYSTEM REQUIREMENTS

Component	Requirement	Recommendation
Operating System	Windows 2000/XP/2003	Windows XP Professional
Processor	500 MHz, Pentium III or equivalent	Pentium 4 or equivalent
Memory	256 megabytes (MB) of RAM	1 GB of RAM
HDD	20 MB hard disk drive (HDD) for install, additional space for logging and cache	20 MB hard disk drive (HDD) for install, additional space for logging and cache
Networking	2 network interfaces (e.g. ethernet, dial-up)	2 network interfaces
VPN Client	500 MHz PIII, 128 MB RAM, 5 MB HDD, Windows 2000/XP/2003	500 MHz PIII, 128 MB RAM, 5 MB HDD, Windows 2000/XP/2003

SALES OBJECTION HANDLING

Topic	Question	Response
Company	I haven't heard of Kerio, who are they?	Founded in 2001, Kerio Technologies, Inc. is a major provider of Internet security software for small to medium sized networks, specializing in network and desktop firewalls and secure workgroup messaging systems.
Configuration & Compatibility	Does it support Active Directory?	Yes. Kerio WinRoute Firewall provides integration to authentication users of both NT domains and Active Directory domains.
	Can it support IP Telephony?	Yes. Kerio WinRoute Firewalls supports various VoIP-based hardware or software such as Cisco IP Phone 7960, IP SoftPhone, SIP Proxy Server, etc. It supports H.323, SIP, and Cisco SCCP protocols.
Administration	Can administration be done remotely?	Yes. The Administration Console can connect remotely to one or more Kerio WinRoute Firewalls.
	Does VPN cost extra?	No. The Kerio VPN client software is included at no charge. VPN clients that connect through the firewall are counted against the total number of users licensed.
Security	Which VPN protocols do you support?	Kerio's VPN uses standard encryption algorithms – SSL for the control channel (TCP) and Blowfish for the data transport (UDP).
	What does the ISS Orange Web Filter do?	The ISS Orange Web Filter is the largest web content database with more than 4 billion pages scanned and 20 million URLs organized into 58 categories. Internet access policies can easily be enforced by allowing or blocking these categories.
	Which protocols are scanned for viruses?	Using McAfee's award winning virus scanner or one of several plug-ins, Kerio WinRoute Firewall scans all inbound and outbound HTTP, FTP, SMTP, and POP3 traffic that passes through the firewall.

PRICING AND LICENSING GUIDELINES

License Model – A base license for the product, which includes 10 users, must first be purchased before selecting the appropriate add-on licenses. A McAfee add-on license requires a McAfee base license and vice versa.
